

Loop 3" EPDM plastic through the Nose Cone hole. Optionally, put 3" EPDM plastic through the Nose Cone hole and use the T-Tab as the stop.

Once 3" EPDM plastic T-Tab is attached through the Nose Cone hole you can wrap it behind MOLLE, helmet straps, antennas, etc., and secure by looping T-tab through end cap loop (shown in picture). Alternatively, loop around end cap without securing T-Tab

Image demonstrates how the T-tab will hold the E/T Light in place. D-clips, S-Biners, lanyards, keyrings, and other methods available for easy attachment

3" T-Tab for easy MOLLE or helmet strap attachment is included with each 6.8A, 6.8IR, 8A, & 8IR Everything/Tactical Light
